## **Curriculum Summary**

Sergi Valverde is a visiting professor in the degree of Biomedical Engineering at Universitat Pompeu Fabra (UPF), from the Department of Experimental and Health Sciences (DCEXS) and member of the Complex Systems Lab and the Institute of Evolutionary Biology. He holds a Degree in Informatics Engineering and a PhD in Applied Physics by the Universitat Politècnica de Catalunya (UPC). His long-term research goal is to develop an evolutionary theory of technology and innovation. Sergi has 15-years of expertise in the areas of complex systems and computer simulation and he has published more than 50 peer-review related articles in network science, systems biology, collective intelligence and technological and cultural evolution (Google Scholar: 3585 citations, H-index: 28). He is a member of the Complex Systems Society (CSS) Council (2016-2018) and Fellow of the European Centre for Living Technology (University Ca' Foscari, Venice). Sergi was involved in the three major IST FET FP6 projects in Complex Systems (PACE, ECAGents and DELIS) and he has coordinated two projects granted by the Spanish Ministry of Economy and Competitiveness.
